The Lake Needs Your Help!

Our neighborhood is filled with so many trees! The trees drop leaves, needles, cones, and branches into our streets. Eventually, if left alone, the debris washes into our storm drains and then into the lake. After 60 years, this debris accumulation along our lake shore has created "The Muck".

Help us with street Hygiene!!

- Blow or sweep any street debris into piles and put it in your green bin.
- If your landscape allows, blow or sweep needles and leaves into your yard where it will decay naturally.
- Yes, the City of Olympia sweeps our streets, but we can still do our part to help.
- You can attend a Lake Committee meeting. They are free and open to anyone! You do not have to commit to anything but learning about our lake.

More Ideas!

The health of our lake depends on all of us. In addition to helping with street hygiene, consider these additional ways to keep our lake healthy.

- ✓ Use native and waterwise plants for landscaping.
- ✓ Install a rain garden.
- ✓ Limit use of fertilizers. Fertilizers can end up in the lake and add to unwanted plant growth in the lake.
- ✓ Contact Al Hatten, Lake Committee Chair, 360-742-7455 for more information.

Thank you for YOUR HELP in keeping everything but water from entering our storm drains and going into the lake.
