Minutes from LRPP Committee Meeting on November 11, 2026

1) The next LRPPC meeting will take place November 29th, 9:30am at the Tot Lot. The agenda is to inspect the current condition of the park and to discuss areas of future improvement. (The next series of meetings will all be park specific.)

2) The meeting was attended by Michael Frank, Sean Clowers, Marian Bailey, Amber Lee and Susan Lindquist.

We reviewed a draft of a LRPPC survey.
We also worked on solutions to the two large tripping hazard roots near the Main Rec picnic tables. We decided to try two different solutions (one for each root) - First a combination of native soil and gravel will be graded to the crest of one root. The new soil mix will be covered with large rubber mats to help prevent erosion. Second root will be graded to it's crest by larger compacted stones, with the hope that no further erosion control would be necessary.

Finally we discussed how to remove the old stone bench (and future decommissioned concrete structures) from Main Rec, and decided to offer it first to KL neighbors, and then put them on FB Marketplace. If they remain unclaimed we'll haul them to concrete recyclers.

3) If it's possible to put this on the website:
